

#Michał Łukaszewicz

date of birth: 03/04/1989

e-mail: michal.lukaszewicz.dev@gmail.com

phone: 731 540 795

My adventure with designing and creating websites began a few years ago, when I started as a freelancer writing code and creating simple websites.

Currently, as a freelancer, I cooperate with programmers and graphic designers on various projects, developing my skills in increasingly advanced technologies.

I specialize in creating and modifying websites based on WordPress.

I have experience in writing my own themes and adapting existing templates to the specific needs of clients. Optimization and integration with various plugins and API's.

I create dynamic, responsive websites using PHP and expand my knowledge of React.js by learning to build modern front-end applications that provide an interactive and smooth user experience.

Apart from programming, music is an integral part of my life. I play drums and my favorite music genres are funk, jazz and salsa. Music gives me not only joy, but also inspiration for creative thinking and approach to work.

#Experience

2023 / Cooperation with I AM FOR DEVELOPER Marketing Agency / Freelancer
